A Equal means
w = .8, B = .1
w = .5, B = .34
Mean reproduction (s)
Distance (degrees)
B Pre-bias noise separates
w = .8
w = .5
Response SD (s)
Distance (degrees)
C Post-bias noise preserves equality
w = .8
w = .5
Response SD (s)
Distance (degrees)
D Complete response distributions
Pre, w = .8
Pre, w = .5
Post, both
Density (s^{-1})
Reproduced duration (s)
